

# Culligan®

## Culligan Gold Series™ Water Softener

### Culligan Gold Series™ Water Softener

"This full-feature model is the standard for premium softeners. It is suitable for any size household. Its "Quadra-Hull™" tank has four layers that resist rust and corrosion, so much so that the tank carries a limited lifetime warranty. The "Accusoft® Plus" microprocessor offers precise regulation. Varying tank sizes allow customization to the homeowner's particular needs. The optional "Aqua-Sensor®" monitors the chemistry of the tank so it regenerates only when needed. Culligan trains its own service technicians and performs its own installation."

# Culligan Gold Series™ Exclusive Design and Technology

The full-flow one inch Power Valve meets plumbing standards and allows you to run numerous water sources simultaneously, minimizing pressure loss and maintaining flow rate.

### Bypass the System

The patented, one-inch Cul-Flo-Valv® lets you bypass the system for uses not requiring softened water – such as watering the lawn – without losing pressure.

### Service-free Operation

Exclusive, non-corrosive 5-cycle motorized control valve directs water flow during service and regeneration cycles.

### Maximum Efficiency

Cullex® resin provides maximum water softening capacity, stability, long life and is back by a limited lifetime warranty.\*

## The Ultimate In Water, and Salt Savings

**Saves over 2 ½ tons of salt and over 20,000 gallons of water within a 10-year period!†**

The patented Culligan Aqua-Sensor® regeneration system option electronically monitors hardness removal to activate regeneration only when necessary, conserving water, salt, electricity, and saving you money.

### Save Salt and Water

The Culligan Soft-Minder® meter option monitors daily water use and activates regeneration only when needed, saving you salt and water.

### Fingertip Programming

The low voltage, fully programmable Accusoft® Microprocessor offers easy data entry performance options that can be set at the touch of a button, to meet individual needs. All programming is safe from most power interruptions and surges.

### Soft Water for Everyone

Guest-Cycle™ recharge feature provides an extra supply of conditioned water when there are more people than normal in the home at the touch of a button.

### Longer Life and Protection

A Dubl-Safe™ brine refill control provides assured shut-off and corrosion-proof components for longer life. A non-corrosive brine plate assists in dissolving salt and protects the system from salt impurities.

## Culligan Exclusive Quadra-Hull™ Tank With Limited Lifetime Warranty

Designed to provide the highest protection in the industry, our exclusive Quadra-Hull™ tank has four layers of construction.
